Lyxor EURO STOXX 50 (DR) UCITS ETF - Daily Hedged to USD - Acc (the "Fund")

ISIN: FR0012399806 - Sub-fund of the MULTI UNITS FRANCE investment company (the "Company") domiciled in France.

Managed by Lyxor International Asset Management S.A.S. ("LIAM")

Investment objectives and policies

The Fund is a passively managed index-linked UCITS.

The objective of the Fund is to replicate, both upwards and downwards, the performance of the EURO STOXX 50 Net Return (net dividends reinvested) (the "Benchmark Index"), denominated in euros (EUR), which represents the 50 leading eurozone stocks, while minimising the tracking error between the Fund's performance and that of the Benchmark as much as possible.

The anticipated level of tracking error under normal market conditions is indicated in the Fund's prospectus.

The Fund intends to achieve its objective via direct replication, that is, by investing primarily in Benchmark Index components. The Fund may use a sampling technique to optimise Benchmark Index replication as well as collateralised securities financing transactions.

Any use of these techniques is indicated at www.lyxoretf.com.

The updated composition of the Fund holdings is available on www.lyxoretf.com.

In order to hedge the dollar (USD) currency risk, the Fund uses a daily hedging strategy to reduce the impact of currency risk against the currency of the Benchmark Index components.

Its net asset value can also be found on the Fund's Reuters and Bloomberg pages and may also be indicated on the websites of the stock markets where the Fund is listed.

The Fund is eligible for the French equity savings plan (PEA) and therefore invests a minimum of 75% of its assets in equities of companies of the European Union.

The share currency is United States Dollars (USD).

- **Invested financial instruments:** shares of eurozone countries, derivative instruments
- **Recommended investment period:** this Fund may not be appropriate for investors who plan to withdraw their investment within a timeframe of less than 5 years.
- **Classification:** Equities from Eurozone countries.
- **Dividend policy:** distributable amounts will be capitalised in full.
- **Net asset value:** daily providing the relevant stock markets are open and orders can be covered.
- **Redemptions:** investors may redeem their equities on the primary market each valuation day before 5:00 p.m. CET and sell their equities on the secondary market at any time during the opening hours of the markets where the Fund is listed.

Risk and return profile

The risk and return category given above is based on the historical performance of the Fund's component assets or the performance of its benchmark index or the simulated performance of a portfolio model. As such, this risk estimation cannot be a reliable indicator of future risk, and it could change over time. The lowest category does not mean a risk-free investment. The Fund has been classified in category 6. The Fund has been classified as category 6 given its exposure to the Benchmark Index. Category 6 indicates that it is possible to suffer a very large capital loss, under normal market conditions, as the value of your investment could fluctuate strongly and quite quickly both upward and downward each day.

The significant risks for the UCITS not taken into account in the above-mentioned indicator and which could result in a decrease in the Fund's net asset value and which the Fund is authorised to include in this document (see the Risk Profile section of the prospectus for more information concerning the risks):

- **Counterparty risk:** The Fund is exposed to insolvency risk or any other type of default of any counterparty with which it enters into an agreement or transaction, particularly in the case of OTC futures or temporary sales of securities. Such an event could result in a significant decrease in the Fund's net asset value. In accordance with the regulations applicable to the Fund, this risk may not exceed 10% of the Fund's total assets for a specific counterparty.
- **Risk associated with the use of derivative instruments:** The Fund may use financial contracts that entail various types of risks, including but not limited to leverage, high volatility, valuation, or liquidity risks.

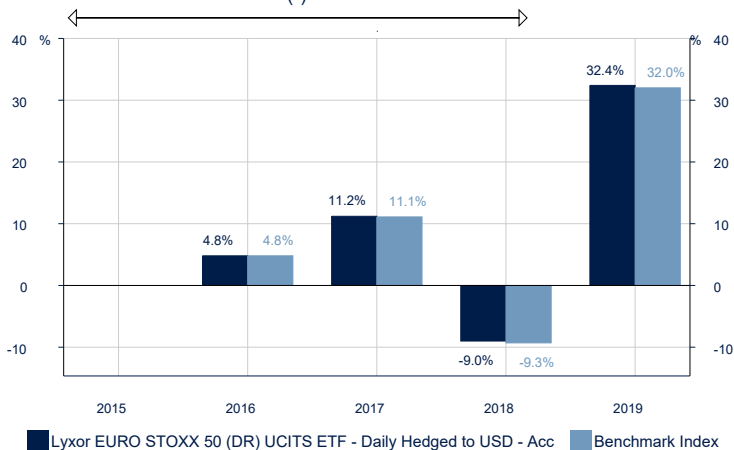

Costs

The fees you pay cover the Fund's management costs, including promotion and distribution costs. These fees are deducted from the potential performance of your investment. Past performances

Annual performance of
Lyxor EURO STOXX 50 (DR) UCITS ETF - Daily Hedged to USD - Acc (in %)
(*)

Past performance is not a reliable indicator of future performance. Performance is shown in US dollars (USD), after deduction of ongoing charges. The Fund was created on 7 January 2015.

The Fund replicates the Benchmark and implements a currency hedging strategy. This strategy matches as closely as possible the currency hedging method of the benchmark provider. The Fund's performance is thus compared to that of the currency-hedged index, the method of which is used by the Fund.

(*) Until 20/09/2018, the performance of the Fund indicated corresponds to that of the Fund - LYXOR EURO STOXX 50 (DR) UCITS ETF (the Absorbed Fund). The latter was absorbed by the Fund on 20/09/2018.
